

The Garden Cottage

Wilshire Garden Market chose the outdoor room located in the back garden. This tiny, romantic house is an intimate garden retreat with an open front and large picture window overlooking a lush shade garden. The designers furnished the room with all-weather wicker, providing comfortable, deep seating. Upholstered in mossy spring green, soft ivory and muted earth tones, the furnishings complement the serenity of the garden. The view of the shade garden led the designers to arrange the room for the homeowners to view the garden while enjoying a glass of wine with the gentle splashing of a water feature in the background. This outdoor room has all the comfort and amenities of an indoor setting. ♣
